MATEUSZ PIEKUT

DEVOPS

IT specialist with twelve years of experience, specializing in virtualization, network solution design, and implementation. Skilled in process automation using tools such as Terraform and Ansible, as well as scripting in Bash. Continuously seeking new challenges and professional development opportunities. In my professional career, I pride myself on the ability to swiftly adapt to new technologies and an unwavering commitment to learning and growth. In the ever-evolving DevOps landscape, flexibility and a dedication to continuous improvement are paramount to success.
